Subject: Health Care

With the adoption of the Health-Care section of the Agreement, the business community requested that SLAC add clarity to same, particularly the DME, MEE and Prosthetic device areas, by developing a list of items and placing said items into their appropriate category. A small group has met to begin this exercise but it is my belief that it would be appropriate to hold a breakout session during the Phoenix meeting to allow any interested parties to become involved. Obviously any product would eventually be passed out of SLAC to the governing board if SLAC deems it appropriate.

Call or email with questions.
