Subject: Medical

Hi Scott,

Hope all is well! As you know, I am working with a group of companies to begin to classify various medical products into the SSTP definitions.

Our goal is to ensure that the required definitions are consistently applied by the Member States. We would like to request that the Governing Board formally assign this issue to a "work group"-or the appropriate committee. Is that something that can be done at the meeting in Tampa? Is there else we need to do?

Thanks, as always, for your help!

Sue
