

A motion by Oklahoma, Kansas and Washington to amend the SSUTA relating to other taxes on communications services:

- A. Except as specifically otherwise provided in this section, the provision of the Agreement and the Library of Definitions shall apply separately to each “other tax on communications services” in the same manner and to the same extent as such provisions and definitions apply to sales and use taxes.

- B. The following are exceptions to the application of the Agreement and the Library of Definitions to each “other tax on communications services”.
 - 1. When a provision of the Agreement or Library of Definitions, excluding Article III, is clearly not applicable to such taxes as determined by a three fourths vote of the Governing Board.
 - 2. When a specific provision of the Agreement or Library of Definitions related to such taxes conflicts with a general provision of the Agreement or Library of Definitions.
 - 3. The following provisions of Article III of the Agreement shall be applied to taxes on other communications services differently than to sales and use taxes as follows:
 - a. The requirement in Section 301 for a member state to provide state level administration of sales and use taxes is modified to allow a designated agent to provide for the administration of each other tax on communications services.
 - b. The requirement of Section 318 for one uniform return for each state and all the taxing jurisdictions within the member state for sales and use taxes is modified to provide that there shall be one uniform return for each type of other tax on communications services within a state.
 - c. The provisions of Section 308 for rate simplification for sales and use taxes are modified to require that each taxing jurisdiction shall have only one rate for each type of other tax on communications services.
 - d. The requirement for tax base uniformity in Section 302 of the Agreement shall apply to each type of other tax on communications services within a state, but shall not be construed to require that the tax base for each type of other tax on communications services must be identical to the tax base for sales and use taxes imposed on communications services.
 - e. The requirement of Sections 303 and 401 for a centralized registration system for sales and use taxes are modified to allow for state-level registration systems for each type of other tax on communications services.

- C. For purposes of this section the term “other taxes on communications services” shall encompass the same taxes, charges, and fees as are included in section 116 of title 4, United States Code, except that “communications services” shall replace “mobile telecommunications services” whenever such term appears. For purposes of this section the term “other taxes on communications services” does not include sales and use taxes on communications services.
- D. The term “communications services” includes the following:
1. Telecommunications services as defined in Part II of the Library of Definitions; or
 2. Video programming services - the offering, transmission, conveyance or routing of radio and television audio and video programming services for purchase by subscribers or customers, regardless of the medium, technology or method of display, including the furnishing of transmission, conveyance and routing of such services by the video programming distributor. This clause (ii) shall include, but not be limited to, “cable service” as defined in 47 U.S.C. § 522(6), interactive on-demand service as defined in 47 U.S.C. § 522(12), the provision of “video programming” by a “multichannel video program distributor” as defined in 47 U.S.C. § 522(20), (13), and the distribution of audio and video programming by providers of “commercial mobile radio service” as defined in 47 C.F.R. § 20.3, when such services are offered for purchase by subscribers or customers of such service; and
 3. Ancillary services as defined in Part II of the Library of Definitions.
- E. The term communications services excludes--
1. data processing and information services that allow data to be generated, acquired, stored, processed, or retrieved and delivered by an electronic transmission to a purchaser where the primary purpose of such purchaser for the underlying transaction is the processed data or information;
 2. installation or maintenance of wiring or equipment on a customer’s premises;
 3. tangible personal property;
 4. advertising, including but not limited to directory advertising;
 5. billing and collection services provided to third parties;
 6. Internet access service; and
 7. digital products “delivered electronically,” including but not limited to software, music, video, reading materials or ring tones.
- F. Definition of terms in this section, except to the extent such term is defined in part II of the Library of Definitions shall not be used to restrict or affect the taxation or exemption from taxation of any product pursuant to Section 316 or 327 of the Agreement.
- G. A Member State shall not be required to comply with the provisions of this section in order to meet the requirements for Member State status under the Agreement or to have the authority to compel remote sellers to collect sales and use taxes, when such authority is granted, until the date federal legislation requires such compliance.

- H. This section shall be applicable to taxes on communications services as that term is described in this section and shall not apply to other provisions of agreements entered into by Member States or political subdivisions with providers of communications services relating to such services.
